

B1
(cont)

Claim 2 (amended). The housing as claimed in claim 1, wherein the closure member includes an extension attachable to one of an interior of the housing, an exterior of the housing and the installation opening of the housing, the holding member connecting the extension to the housing.

F2
cont

Claim 3 (twice amended). The housing as claimed in claim 1, wherein the extension has a thickened portion in position on the holding member under a tensile loading of the closure member.

B2

Claim 4 (twice amended). The housing as claimed in claim 1, wherein the closure member has a molded recess that enables the closure member to act as a hinge.

Claim 5 (twice amended). The housing as claimed in claim 1, wherein the closure member has an upper lip coming to rest over the edge of the installation opening.

Claim 6 (twice amended). The housing as claimed claim 1, wherein the closure member has a lower lip at least at a point furthest away from the extension, said lower lip sliding under an edge of the installation opening after
